General:

Why USF? Why MSDS? Your personal goal after graduation?

Linear Algebra:

- 1. what's linear independent?怎么确定是 linear independent
- 2. invertible 的矩阵是不是一定就是 diagonalizable?
- 3. eigenvalue, eigenvector
- 4. what is a linear transformation in linear algebra
- 5. matrix diagonalization
- 6. 矩阵的 rotation 和 translation
- 7. how to inverse a matrix
- 8. Given two equations, A*V1 = B and A*V2 = B. (A is a matrix, B is a vector, V1 and V2 are two solutions), are there any additional solutions and write five of them.在我回答以后问
- 我,这个 equation 一共有多少 solution?
- 9. If $A^2 = B^2$, can we say A = B or A = -B (Matrix)
- 10.向量线性相关概念
- 11. 线性代数题没听懂,貌似最后问我矩阵的 size

Statistics:

- 1. 一个国家的 Annual 什么是个怎么的分布?是 left skewed?or right skewed
- 2. What's covariance?
- 3. Outlier 对中值和均值的影响?
- 4.伯努利分布?
- 5. two independent events: A,B 问 A,B intersection b 的概率
- 6. p-value 在统计中有什么作用
- 7. 什么是 confidence interval, 什么是 prediction interval
- 8. 从统计学角度分析,为什么接受辅导更多的学生, GPA 反而越差
- 9. The meaning of percentile
- 10. Type I error and type II error
- 11.Covariance 和 covariance coefficient 的区别?
- 12.在一个分布中,中位数和平均数的关系
- 13.95%的 confidence interval,一个人说他的 95%的数据落在这个区间内,是否准确?
- 14. What is a Bernoulli Trail?
- 16. How to narrow a confidence interval? (2 ways)
